

ABSTRACT

Blends comprising a glyceride and ursolic acid and oleanolic acid in weight ratios of 1:99 to 99:1 that contain less than 20 wt% of natural apolar components and/or low molecular weight components, normally present in natural extract for ursolic acid and oleanolic acid do not display the negative off taste of the natural extracts anymore.

1. The present invention relates to a blend of a glyceride and ursolic acid and oleanolic acid in weight ratios of 1:99 to 99:1 that contain less than 20 wt% of natural apolar components and/or low molecular weight components, normally present in natural extract for ursolic acid and oleanolic acid do not display the negative off taste of the natural extracts anymore.
